place to another. That's it! The machines that make up the Internet treat all the information they handle in exactly the same way. In this respect, the Internet works a bit like the postal service.

How the Internet works: A simple introduction

Great Works for 25 years – and counting. Over the course of the past 25 years, we've grown by putting our customers first. Today, we're doubling down on that commitment with GWI Fiber Internet – bringing unparalleled customer service and a faster, more reliable digital future to everyone we serve.

Home - GWI - Great Works Internet

The way most internet works these days is a simple, three-part process: The internet service provider (ISP) gets the internet signal via fiber from a collection of data servers, moves that signal to a central station, or hub, then distributes it to the modems of individual subscribers.. Those first two parts tend to be the easiest to accomplish, while the third — getting the signal to those ...

How it Works: The technology behind satellite internet ...

Streaming requires a relatively fast internet connection; just how fast depends on the type of media you are streaming. Although each streaming service can be a little different in terms of requirements, safe bets for services like Hulu, YouTube, and Netflix are 2-3Mbps for SD, 5-6Mbps for HD, and 13-25Mbps for UHD and 4K content.

Internet Streaming: What It Is and How It Works

That's a high level overview of how the internet works, at least. There are lots of little topics that are important to the internet we all use, and which you can read about in more detail. For example, every device on a network has a unique, numerical IP address on that network. Data is sent to these addresses.
