Hydroponics Hydroponics Beginners Gardening Guide

Hydroponics is a form of gardening that uses no soil, but instead grows plants in a solution of water and nutrients. A hydroponic system can grow plants and vegetables faster and year-round. Plants grown this way usually yield more, require less space, and conserve soil and water.

How to Start Hydroponic Gardening

Beginner's Guide to Hydroponic Gardening. Most people are under the impression that hydroponic gardening is expensive, difficult and requires a lot of knowledge. The truth is, it can be simpler, easier, and more productive than in-ground gardens! This is because with hydroponics, the grower has full control over the nutrition the plant is getting — and setting up a

Hydroponic gardening uses considerably less water than soil gardening, because of the constant reuse of the nutrient solutions. Due to lack of necessity, fewer pesticides are used on hydroponic crops. Since hydroponic gardening systems use no topsoil, topsoil erosion isn't even an issue.

Hydroponic gardening for beginners - Greentrees Hydroponics

In hydroponics, water and a solution of nutrients do all of the work to make the plant grow...there is no soil! The picture to the right is an example of one of the most basic types of hydroponics systems, a passive irrigation setup. In this setup, the plants are held in place by a growing medium (in this case perlite is being used).
