multi-valve, four cylinder engine family comprising 1.3, 1.4, 1.5, and 1.6L naturally aspirated versions and a 1.5L turbocharged version. Introduced in 1992, this was Hyundai's first engine designed entirely in-house. Design objectives were to provide high performance and good fuel economy with excellent durability at a reasonable cost.

Hyundai Alpha engine - Wikipedia

The heart of the Genesis 5.0 R-Spec model is a new Tau V8 engine producing 429 horsepower at 6,400 rpm and 376 lb. ft. of torque at 5,000 rpm. This new Tau V8 represents the most powerful Hyundai engine ever, with a higher specific output (85.8 hp/liter) than its normally-aspirated premium luxury competitors.

Tau V8 engine - Hyundai Newsroom

The camshaft position sensor is an electrical component that sits close to the engine's camshaft. It monitors the

Hyundai finds new engine problem, prompting another recall ...

The 1.6L G4FC is equipped with continuously variable valve timing system named as CVVT for the intake timing only. The camshafts are chain driven. There are no hydraulic cam followers (valve clearance adjustment is required every 60k miles/100,000 km). The fixed geometry intake manifold is made of light-weight and cheap composite material.

Hyundai KIA 1.6L Engine (Gamma MPI/GDI/T-GDI) specs ...

1) Drain the engine oil. 2) Remove the oil pan (FIG 1). The oil pan has to be removed for the following reasons: 2.1) The timing chain cover cannot be removed without removing the oil pan first. This is because of the two dowel pins in each side of the timing chain cover that mesh with the oil pan. See FIG 1-B. 2.2) With the oil pan removed, it would be easier to untighten and tighten
