of $s=a+ib$, or $s=a+jb$ in electrical engineering terms (electrical engineers use "j" instead of "i" because current is represented by the variable i).

Analog signal processing - Wikipedia

One of the causes of intersymbol interference is multipath propagation in

Get Free Signals And System Simon Haykin Solution Manual

which a wireless signal from a transmitter reaches the receiver via multiple paths. The causes of this include reflection (for instance, the signal may bounce off buildings), refraction (such as through the foliage of a tree) and atmospheric effects such as atmospheric ducting and ionospheric reflection.

The online learning system is another web-based application that is revolutionalising the learning platform of education. This system compliments the traditional face-to face teaching and learning format. In the on-line system, students can access class notes, submit assignment and also join a discussion group with other learners. 3.
