Clustering, Classification And Retrieval No. 1

Text classification or topic extraction from text, on the other hand, needs to know the topics of a text before starting the analysis, because you need to tag data in order to train a topic classifier. Although there's an extra step involved, topic classifiers pay off in the long run, and they're much more precise than clustering techniques.

Retrieval No 1  
The mainstream  
research on detecting  
fake news so far has  
been text-based  
detection approaches,  
but they have inherent  
limitations such as the  
difficulty of short text  
processing and  
language dependency.  
Thus, as an alternative  
to the text-based  
approach, the context-  
based approach is
